Quickbooks® Workshop at PCC

This week, a Quickbooks® Workshop for government departments and state governments was held at the Assembly Hall of Palau Community College (PCC). Quickbooks® is a book-keeping software that combines a variety of accounting processes into one user-friendly system. The primary function of the software is to alleviate the use of multiple tables, spreadsheets, and tracking sheets necessary to document & maintain accounting tasks. Accounting figures are also easily reconciled for tax purposes with the Quickbooks® software. Developed by Intuit Inc., Quickbooks® can be customized based on the needs of a particular business. The workshop held at PCC introduced the main components of the software to government workers who may be involved in the accounting processes of their respective offices.

Participants of the Quickbooks® Workshop
